Title: REFRIGERATED MERCHANDISER

**VERIFIED STATEMENT BY ROBERT JAMIESON  
UNDER 17 C.F.R. §324(b)(1) IN SUPPORT OF  
PETITION TO CORRECT INVENTORSHIP IN PATENT**

I, ROBERT JAMIESON, hereby declare as follows:

1. I am the President of Jamieson Electric and Refrigeration Ltd. ("Jamieson Electric") of Suffolk Road, Charlottetown, Prince Edward Island, Canada. I have been the chief executive officer of Jamieson Electric since its founding 26 years ago.
2. Jamieson Electric is in the business of designing, installing, repairing and maintaining refrigeration and related equipment, e.g., for stores, warehouses, fish and potato processing plants and the like.
3. In 2003 Jamieson Electric was approached by Atlantic Store Decor Inc. ("Store Decor") of Pooles Corner, Prince Edward Island, to work with them on the development of a freestanding merchandiser in which various types of potatoes could be segregated and sold according to their use, such as baking, frying or mashing. Store Decor advised us that it had contracted with FoodTrust of Prince Edward Island Limited ("FoodTrust") to engineer and build this merchandiser. We agreed to act as a subcontractor to Store Decor on this project for the purposes of developing a

refrigeration system that could be incorporated into the subject potato merchandising units and keep the potatoes stored therein at a constant temperature of about 45-50° F.

3. I worked personally on the development of the refrigeration system for the potato merchandiser under our contract with Store Decor, and I was joined in this effort by Keith McKenzie, who is the refrigeration foreman of Jamieson Electric and has been with the company for about 20 years. We submitted our work on this project not only to Store Decor for approval but also to Woodrow Wilson, Vice President of Marketing for FoodTrust, who (we were told) had originated the basic concept of the potato merchandiser.

4. Mr. McKenzie and I eventually developed a workable refrigeration and air flow system for the potato merchandiser, wherein a cooling unit was installed therein and the air flowing over the potatoes was recirculated back to the cooling unit. In this way, the cooling unit would be cooling air that had previously been cooled and would thus operate more efficiently. We created a completed prototype of the merchandiser including the refrigeration system we designed and developed.

5. I have been advised by FoodTrust's legal counsel that FoodTrust filed a number of patent applications in Canada and the United States relating to the novel refrigerated merchandiser. One of these was U.S. Application Serial No. 10/816,803, filed April 2, 2004, which named Woodrow Wilson as sole inventor and which issued as Patent No. 7,062,931. I have been advised further that certain claims of the aforesaid patent include the refrigeration and air flow concepts that Keith McKenzie and I conceived of, designed and developed for the merchandiser, and that, therefore, I should have been named as a co-inventor in this patent with Mr. Wilson (and Mr. McKenzie).

6. The error of omitting my name as a co-inventor was made innocently and without any deceptive intent on my part. I was not advised until recently that any patent applications had been filed or any patents issued on the refrigerated merchandiser which included my inventive contributions thereto.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the subject patent.

I, KEITH McKENZIE, hereby declare as follows:
